

Average and percentage bed occupancy for wards grouped by speciality code 13/07/2020 to 12/07/2021

Averages are across all wards with the same speciality code and all the days in a week.
 Percentage occupancy is calculated by dividing the summed occupancy for all the wards and all the days in the week by the summed availability for all the wards and all the days in the week.
 Only physical occupancy of a bed is counted - leave days are excluded.
