

<b>COLLABORATIVE RISK ASSESSMENTS</b>	
<b>Indicator number</b>	MH5
<b>Indicator name</b>	Collaborative Risk Assessments - Education
<b>Indicator weighting (% of CQUIN scheme available)</b>	XX % (50 % of CQUIN scheme available)
<b>Description of indicator</b>	The provision of an education training package for patients and qualified staff around collaborative risk assessment and management.
<b>Numerator</b>	Not applicable
<b>Denominator</b>	Not applicable
<b>Rationale for inclusion</b>	<p>Currently very few users of forensic services are actively involved in their risk assessment and developing their risk management plan.</p> <p>The Department of Health 'Best Practice in Managing Risk Guidelines 2007' advises that a collaborative approach involving service users should be used in the risk assessment process. My Shared Pathway (a previous Secure Service CQUIN) promotes collaborative approaches to a service user's care and treatment provided by secure services. Furthermore, recovery approaches emphasise that risk management should be built on the recognition of the service user's strengths and should emphasise recovery, and this is more likely to be achieved using a collaborative approach.</p>
<b>Data source</b>	Provider
<b>Frequency of data collection</b>	Bi-annual
<b>Organisation responsible for data collection</b>	Provider
<b>Frequency of reporting to commissioner</b>	Bi-annual
<b>Baseline period/date</b>	Not applicable
<b>Baseline value</b>	Not applicable
<b>Final indicator period/date (on which payment is based)</b>	<p>Q2.</p> <p>Report by the provider detailing the education package the provider has developed for staff and service users about risk assessment and risk management. The training will encompass a wide range of risks (including positive risk taking), and will not be limited to just risk of violence. The training will be provided jointly to both staff</p>

	<p>and service users in order to promote discussion (It is recognised that not all staff would be able to attend joint sessions and so provision should be made for the training to be delivered to them with service user reflections from joint training reflected in this). The report will explicitly specify how the training package will support the eventual goal of risk assessment and management plans being developed in a collaborative manner between the service user and the clinical team (and specifically, training on how to approach and conduct a risk assessment in collaboration with a service user).</p> <p>Q4. Written report by the provider detailing the delivery of the educational program to staff and service users about risk assessment and risk management. 90 % of qualified clinical staff to have received training in collaborative risk assessment. All service users to have been offered relevant education and training or, if not clinically well enough, detail in their care plan as to when training will be offered.</p>
<b>Final indicator value (payment threshold)</b>	<p>Q2. 40 % of this CQUIN value</p> <p>Q4. 60 % of this CQUIN value</p>
<b>Final indicator reporting date</b>	30 April 2015
<b>Are there rules for any agreed in-year milestones that result in payment?</b>	Q2 report must be submitted in order to be eligible for the Q4 payment.
<b>Are there any rules for partial achievement of the indicator at the final indicator period/date?</b>
