

FOI 0525/2024 Response

Request

I would like any operating procedure or service procedure you have for adult Psychiatric Decisions Unit, at the Oleaster Hospital.

I am in particular looking for information on how and when a mental health nurse can escalate concerns to a psychiatry doctor or if a Patient themselves can.

Response

Please find attached the requested policy and note that staff members names have been redacted.

This is because we do not routinely release staff members personal information for those below a band 8c role.
