

## **FOI 065 2024 Response**

### **Request**

I am looking for training material used by the learning and development team to educate staff on how they can be trauma-informed in their practice.

### **Response**

The training material used by the Trust's Learning and Development Team for trauma informed practise is based within our E- Learning Zone (online staff training platform).

This is only accessible by staff and cannot be downloaded to share as there is no such function.

However, we can share the link below which provides some context around the training which you may find helpful.
