

FOI 0162_2024 Response

Request

I am conducting an audit on physical health monitoring for patients on antipsychotic medication within East AOT BSMHFT. To complete this audit, it would be beneficial to obtain the mortality rate data, including the rate of sudden deaths, for the past two years.

Could you kindly provide the mortality data for East AOT, including the mortality rate of sudden deaths, for the last two years? I have included the managers of East AOT in this communication.

Clarification: Number of mortalities East AOT patients who were on antipsychotic medication for calendar year 2022 and 2023

Response

Table 1. Count of East AOT Patients prescribed Antipsychotic Medication, by Year of Death			
***Note: There were no sudden deaths among the patient cohort in the years requested.			
Calendar Year	Deceased Patients	Patients on Caseload in Year	Mortality Rate per 1000 patients
2022	3	118	25
2023	1	121	8
