

## **FOI 0272\_2204 Response**

### **Request**

I am a junior doctor in the process of writing a paper about the ethics of using electronic monitoring (or 'tagging' devices) in forensic services for patients on leave.

I am trying to gauge the number of Medium Secure Units in the UK that have implemented electronic monitoring, and wondered whether it is being used in your services?

### **Response**

Please note that the Trust do not use tagging devices and the return for your request for information is NIL (0).
